

INTRODUCTION

Motor insurance statistical yearbook is issued once more in its new form, updated with the data for 2023. The supervision of the reform was made by the competent HAIC's Motor Insurance Committee in collaboration with HAIC's Research Department while data collection, processing and tabulation was performed by HAIC's M.I.S. Department.

The provided data allow the estimation of the technical basis of underwriting insurance (claims frequency, average claim cost) per vehicle use and insurance cover. The data are presented on a yearly basis and are aggregated while neither reference is made in relation to the commercial level of premium rates, nor to the general expenses of the insurance business.

The yearbook's new form is enriched with new data, such as the geographical distribution of claims indicators based on the insureds' postal addresses and features a better data presentation with the use of graphs. This yearbook provides useful and business relevant information to the members of the Association as well as an overview of Greece's Motor insurance branch to whom may be interested.

The yearbook is structured in four sections. In the first section, calendar year's 2023 claims are presented and analysed, as well as the relevant indicators which derive from their study (along with the latter's values during the last years). In the second section, the geographical distribution of claims is presented. In the third section, financial data of Motor insurance for fiscal year 2023 are recorded. In the fourth and last section, the evolution of claims per accident year is presented.

In this yearbook, full data are included for 29 Insurance Enterprises, whose total market share is estimated at 96%, which were active in Motor insurance in 2023. Their names can be found in the appendix.

It should be noted that this yearbook, which is available through HAIC's website (www1.eaee.gr), is open for further improvement, and therefore feedback would be valuable towards this scope.

EXECUTIVE SUMMARY

Motor insurance is one of the most important insurance branches in Greece. Motor insurance premium represents 40,6% of Non-life insurance business and 21,4% of the total premium (Life and Non-Life insurance), as of 2023. Total premium refers to gross direct premium written by Insurance Enterprises active in Greece either by establishment or through freedom of services and make use of HAIC services.

Total premium (as mentioned above) of motor insurance (which is reported in branches 3. Land vehicles and 10. Motor third party liability - MTPL) for 2023 was € 1,15 billion, increased by 4,43% compared to 2022. At the same period, total Non-life business recorded production of € 2,84 billion, increased by 10,95% over the previous year.

This Statistical Yearbook contains data for 29 insurance enterprises, which are estimated to accumulate 96% of the total motor insurance market for 2023.

The most important financial ratios about motor insurance for all insured vehicles and all covers, for the years 2022 and 2023, follow in the table below¹:

Accident year – first estimation	2022	2023
Claims frequency	9,96%	9,58%
Claims frequency – MTPL	7,15%	7,01%
Average claim (€)	1.210	1.265
Average claim (€) – MTPL	1.385	1.397

Financial year	2022	2023
Loss ratio	54,56%	61,27%
Loss ratio - MTPL	59,30%	70,36%

Actuarial estimation – ratio evolution	2022	2023
Loss ratio – MTPL (accident year) including actuarial/statistical reserves	78,63%	80,36%

The evolution of key indicators and their breakdown per vehicle category (according to the first estimation of the accident year), are shown in the following graphs:
